Ceramic Fiber Pipe

Ceramic fiber pipe is designed according to user requirements, using the loose cotton through the wet vacuum suction molding made unit weight after drying, make different calcine, specifications, models, performance of various kinds of fiber products

Temperature (°C)	1000
Color	white
Density (kg/m3)	100-180
Shrinkage on heating (%,24hra)	3
Thermal conductivity (w/m.k)	0.034(20°C)
Length (mm)	1000
Thickness (mm)	50-150
