Ceramic Fiber Module

Ceramic Fiber Modules are made from the corresponding ceramic fiber material acupuncture blanket processed in dedicated machines according to fiber component structure and size. Ceramic fiber folded modules is directly fixed in industrial furnaces shell plate by various anchorage.

Type		HZ Module
Classified Temperature		1430℃
Working Temperature		1350℃
Density(kg/m3)		200-220kg/m3
Linear Shrinkage		1350C*24h≤-3
Thermal Conductivity(W/m.k)	200℃	0.050-0.060
	400℃	0.095-0.120
	600℃	0.160-0.195
Chemical Composition %	Al ₂ O ₃	39-40
	SiO ₂	43-45
	ZrO ₂	15-17
Size		300/600*300*150-350 mm
